

## Past Reflections

### Wreath

12" block

Print off the pattern sheets and join along the dotted line.

Cut your background fabric to 13" and transfer the design to the background fabric using your favourite method.

Start the applique of this block with the circle of the wreath, joining the ends so that you can not see.

Next add the individual leaves so that the points just touch the centre circle.

Once all the applique is complete, spray lightly with water, and place face down on the ironing board. Press lightly.

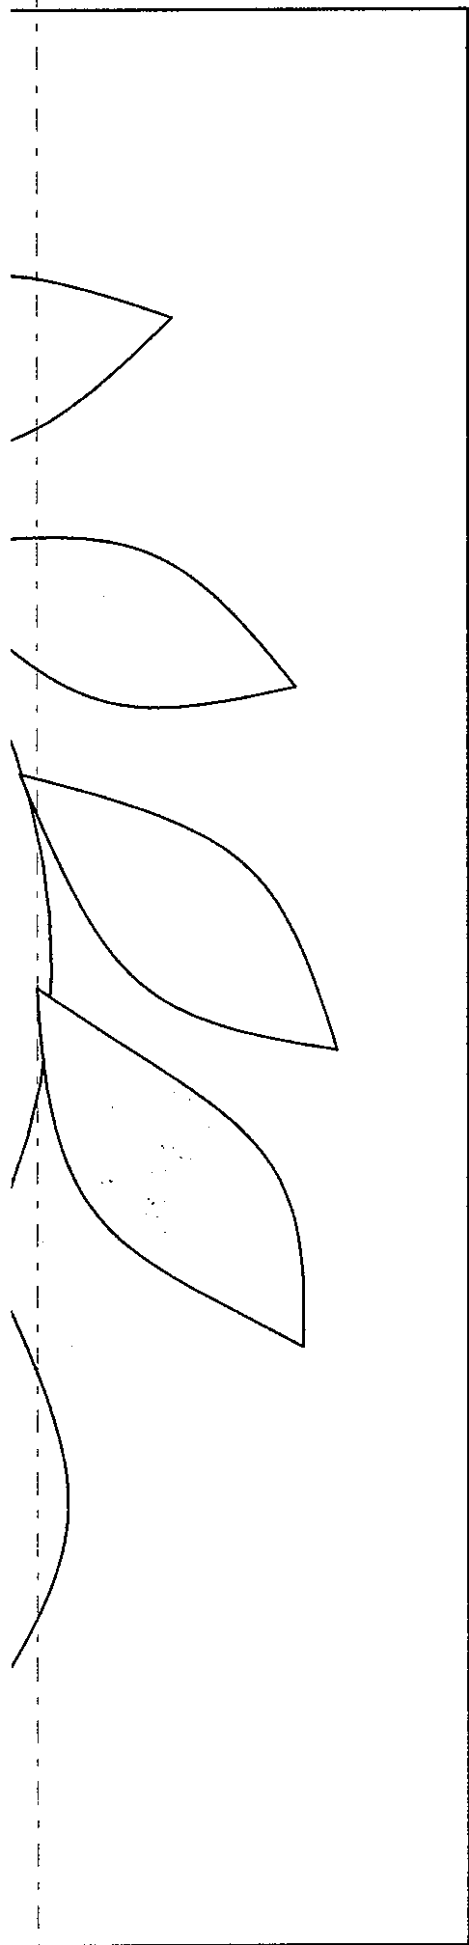

The completed block can be trimmed to 12 ½".
